

## **Frequently Asked Questions (FAQs)**

Grapefruit has partnered with the Washington Township Public School District to offer no out-of-pocket cost COVID-19 testing services to the community. We are dedicated to helping ensure the staff and community are safe and protected from COVID-19 infections. Grapefruit's Health and Wellness solutions include COVID-19 mitigation services including testing to hundreds of organizations across the United States. They have administered over one million tests to patients since the onset of the pandemic. They are public health and infectious disease experts, board-certified physicians, first responders, and scientists dedicated to evidence-based COVID-19 response and mitigation. Their mission is to work with organizations across the country to offer healthcare services that will facilitate stopping the spread of COVID-19 in its tracks. **When will Grapefruit start offering testing and who does it include?**

**Testing is available for:** Students/Staff/Community Members

**Testing starts on:** February 7, 2022

**Testing Locations:**

**Washington Township High School (WTHS)**

Address: 529 Hurffville - Cross Keys Rd #2831, Sewell, NJ 08080

Days of Operation: Monday through Friday (7am - 7pm)

Saturday and Sunday (7am - 12 noon)

**Orchard Valley Middle School (OVMS)**

Address: 238 Pitman Downer Rd, Sewell, NJ 08080

Days of Operation: Monday through Friday (7am - 7pm)

**Bells Elementary School (Bells)**

Address: 227 Greentree Rd, Blackwood, NJ 08012

Days of Operation: Monday through Friday (7am - 7pm)

Though testing will be offered to anyone wishing to be tested, Washington Township School District will also be implementing a Test to Stay Program with details to follow. Everyone being tested must sign a consent form. The link to digitally register is below. For those under 18 years old, parents or guardians must sign consent forms beforehand. No one will be tested who hasn't signed the consent form, including those under 18.

To expedite testing at the site, we encourage that you pre-check consent. You can [click this link](https://bit.ly/3ovm2wB) or copy and paste the URL below into your browser. Additionally, you can scan the QRCode with your smart device or cell phone. The process involves digitally completing, signing and submitting the form, which registers you before you test.

**English Consent URL:** <https://bit.ly/3ovm2wB>

**Spanish Consent URL** <https://bit.ly/3sk6qxc>

**Or scan English Consent QR CODE below    Or scan Spanish Consent QR CODE below**

*Additionally, people can register at the testing site. Those under 18 will have to be with a parent or guardian if they have not pre-consented. At the site there will be instructions on what you should do prior to testing and next steps. This will also include a QR Code similar to the one above posted at the testing site that can be scanned, completed, signed and submitted before testing. It is recommended that all those who want to test pre-consent using the consent form link in this document.*

### **Grapefruit Health & Wellness Solutions**

#### **Turnkey COVID-19 Testing, Consulting, & Medical Services**

*Grapefruit is the only comprehensive testing program that utilizes the medical screening and surveillance of those being tested along with the integrated collection and reporting of test results. By utilizing immediate PCR testing as a follow-up to a positive antigen test, you are assured that false-positive tests can be remedied quickly while rapidly and quickly identifying possible outbreaks. Grapefruit also facilitates contact tracing and reporting as well as medical triage and follow-up with the patient or guardian if they are under 18, on all positive results and for all close contacts.*

#### **What is the Grapefruit Approach?**

*We provide everything needed for the design and implementation of a successful COVID-19 antigen or PCR screening testing solution, including professional testing staff and onsite coordinators, equipment, and overseen daily by operational management. We have a proven track record of implementing and running large scale testing programs. We are equipped to process and service from 100 to 50,000 people at organizations.*

If your question isn't answered below, please email us directly at [Charles@GrapefruitHealth.net](mailto:Charles@GrapefruitHealth.net). You can also learn more about us at [www.GrapefruitHealth.net](http://www.GrapefruitHealth.net)

### **Why is testing important for the community?**

The best way to protect our community from COVID-19 is to take preventative action, and testing is a core pillar of a safe community. These tests allow us to quickly identify if someone has been infected with the virus so they can isolate and get the care and support they need while also identifying any close contacts to stop the spread.

### **How does testing help?**

Testing is a non-invasive process that monitors the community from infections. By implementing a testing protocol as Grapefruit Health offers, it ensures that any positive case is identified immediately and actions are taken to isolate the person from spreading the virus unknowingly to their peers. By stopping the spread we know the community is protected from further infections.

### **What is the Test to Stay Program?**

Test to Stay is a new protocol that meets quarantine and close contact mandates allowing students and staff to stay in school if they test negative every other day for the period of quarantine. These test results will be documented on a "Test to Stay" ticket that the tester will need to sign and date documenting that the individual presenting the ticket has been tested. While this ticket should be retained and presented to school officials on request, an electronic record of "Test to Stay" will also be kept and shared with school officials. Grapefruit and the Nursing Team of Washington Township School District will be working closely to ensure accuracy of this information.

When there is a suspected exposure in one of the schools, that school's Nurse will provide the ticket necessary to be presented to the Grapefruit Team. You will then need to bring your child to one of the three conveniently located sites (listed above) for the Grapefruit Team to complete the testing procedures.

If the Rapid Antigen test is negative this will be written on the ticket, authenticated and then added to the database for the school Nurses, to ensure they can go back into school. In accordance with CDC and Washington Township School District Guidelines, the tests will need to occur on day 1, day 3 and day 5 after the exposure.

If the Rapid Antigen test is positive this will also be written on the ticket, authenticated and then added to the database for the school Nurses. However, the individual with a positive result will not be allowed to go back to school until either the PCR result comes back negative or you have quarantined for 5 days and symptoms have subsided.

The test results will also be emailed to the appropriate Guardian of the Student. If you are a Faculty/Staff the email for your test result will be emailed directly to you.

If you feel there is a chance you were exposed over the weekend or one of your cadence days is on the weekend, the high school location will be open 7am to 12 noon both Saturday and Sunday.

### **What kind of tests do you administer?**

We utilize Rapid Antigen and PCR as the primary tests.

The Rapid Antigen and the Confirmatory PCR is administered at the same time as a backup in case the Rapid Antigen is positive.

**PCR** test stands for **polymerase chain reaction** test. This is a diagnostic test that determines if you are infected by analyzing a sample to see if it contains genetic material from the virus.

You will receive your rapid test result in about an hour if not sooner by email or text. The PCR test result is often available up to 72 hours and based on volume at the labs, it may be delayed further.

**You can find additional information about the specific tests we use on the relevant product websites here:**

[Celtrion DiaTrust Rapid Antigen \(Patient Fact Sheet\)](#)

[Abbott BinaxNOW \(Patient Fact Sheet\)](#)

[Quidel QuickVue \(Patient Fact Sheet\)](#)

### **What does this cost?**

Grapefruit services are provided at **no out of pocket cost** to the patient. If the patient has insurance we bill the insurance and with the EUA (Emergency Use Authorization) all insurances must pay for COVID-19 mitigation services. For those without insurance, the Families First Coronavirus Response Act (CARES) ensures that COVID-19 testing is free to anyone in the U.S., including the uninsured.

For the duration of the public health emergency, all forms of public and private insurance, including self-funded plans and government insurance, must now cover FDA-approved COVID-19 tests and costs associated with testing with no cost-sharing, as long as the test is deemed medically appropriate by an attending health care provider. **You will never receive a bill for Grapefruit's services or the laboratory.**

### **Will there be medical professionals/doctors at the testing site if there is a medical issue with testing or medical questions?**

The testing schedule is designed so that there are medical healthcare providers at every testing date on the premises. They are available through our state-of-the-art Telehealth Mobile Units at the front of the line where the test is administered by a certified testing professional.

### **What is Telehealth?**

Approved by the CDC Telehealth is a connectivity-powered mobile service that permits a Grapefruit clinician to evaluate a patient prior to an order being placed and a test being performed for COVID-19.

### **Why do I need to see a Telehealth provider when I'm getting tested?**

Tests are ordered by Grapefruit providers, who evaluate patients being tested and also assess how patient needs are best met. By building a baseline for each patient, if they test positive the Grapefruit Healthcare provider will follow up to answer any questions and to provide isolation guidance.

### **What will the Telehealth provider do with my personal information?**

All information is protected in our HIPAA-compliant electronic medical record. Your personally identifiable information will never be shared with a third party or your organization.

### **What if I test positive?**

If you test positive, you will be directed to stay home and isolate. A Grapefruit Healthcare provider will be in touch with you to answer any questions and to review isolation protocol with you. Positive cases will be

reported to your organization so that they know you will be out of work if you are staff and missing school if you are a student.

If you have other questions please email Grapefruit directly at [Charles@GrapefruitHealth.net](mailto:Charles@GrapefruitHealth.net). You can also learn more about us at [www.GrapefruitHealth.net](http://www.GrapefruitHealth.net)
